CARRIER OBJECTIVE

Dedicated Full Stack Developer with experience in full stack and mobile app development seeking to leverage robust coding skills and a passion for responsive design in a dynamic tech environment. Eager to contribute to innovative projects and continuous improvement efforts while advancing in technical proficiency and collaborative success.

TECHNICAL SKILLS

- Html
- React, React Native
- Springboot
- Git
- Css
- Angular
- MySQL
- Docker
- JavaScript
- Redux
- MongoDb
- AWS

PROFESSIONAL EXPERIENCE

Organisation - **Scrapify Ecotech Private Limited**

Mar 2023 - Present

Position - **Full Stack Developer**

- Full Stack Development:** Engaged in the full lifecycle of software development, from initial requirement gathering and design to deployment and maintenance. Implemented end-to-end solutions using React, Spring boot, and MongoDB .
- Mobile Application Development:** Development of a cross-platform mobile application using React Native. Implemented advanced UI components and animations to enhance user interaction.
- Testing and Deployment:** Rigorously tested the application across different devices and ensuring consistent performance and user experience. Leveraged Docker for containerized environments and utilized AWS services for seamless deployment, minimizing user disruption.

Organisation - **Trendace Software Solutions**

Nov 2022 - Feb 2023

Position - **Front End Developer**

- Developed and maintained responsive web applications using HTML, CSS, JavaScript and Angular.
- Integrated RESTful APIs to fetch and display data in real-time, improving user experience.
- Implemented and maintained version control using Git, ensuring efficient collaboration among team members.

EDUCATION

B.E Mechanical Engineering 2014 - 2018
Jawahar Engineering College, Chennai. GPA : 6.2

CERTIFICATIONS

Advanced web development course 2022
Networkz systems, Marthandam.

PROJECTS

Fleet Management Application - Angular, Spring boot, Mysql

- The Fleet Management Application was developed by using Spring Boot, Angular and MySQL technologies and also follows the spring MVC architecture pattern.
- The application provided various reports and analytics to help fleet managers make informed decisions and improve the overall efficiency of their fleet.
